## DEPARTMENT

Pharmaceutical Medical Expertise: Anytime, Anywhere.

# Partnering with you every step of the way

## We are your Global Medical Consultancy

Led by industry experts including two board-certified pharmaceutical physicians, our multi-disciplinary team of experts delivers on-demand medical department functions and solutions tailored to your organisation's specific requests and needs. With medical directors in both Australia and the United Kingdom, we have the flexibility to deliver expert coverage across 24 hours. We provide immediate access to a full array of medical functions, wherever and whenever you require, and you only pay for what you use, making My Medical Department a cost-effective solution. As our reputation is our greatest asset, you can be assured of our high quality, expert professional support at all times.

## Why choose My Medical Department?

- Physician-led global medical consultancy
- On-demand medical department support
- Full spectrum of medical functions
- Trans-global team offering 24/7 availability
- Tailored to your organisation's specific needs
- Experienced and reliable

## Keeping patients at the centre through our strong clinical heritage

As a physician-led team mostly comprising qualified doctors and pharmacists, My Medical Department is committed to upholding patient safety and promoting the quality use of medicines. This is enacted through a strong focus on the quality of our work and integrity of our decision-making. Each of our two medical directors holds a current license to practice with the UK's General Medical Council, as well as specialty registration (equiv. "board certified") in Pharmaceutical Medicine. We pride ourselves on the quality of our scientific and clinical support, bringing excellence to the development and use of your products throughout their lifecycle.

# Our comprehensive service offerings

## Medical Affairs

Delivering insights through Advisory Boards and KOL engagement activities, developing evidence generation plans and expertly communicating your data throughout the product lifecycle

## Market Access

Strengthening your market position through formulary access materials, budget impact modelling and health technology appraisals

## Pharmacovigilance

Ensuring patient safety during clinical development and post-launch including case processing, signal management and QPPV activities

## Regulatory

Streamlining your pathway through the complex and highly regulated landscape, including gap analysis/regulatory due diligence, clinical overviews, regulatory agency submission and negotiation

## Medical Information

Creating standard documents and custom responses, and providing 24/7 medical information services including the receipt and follow-up of adverse events and product quality complaints

## Medical Sign-off and Code Compliance

Helping you navigate your compliance obligations and optimising your promotional campaigns to ensure the most impactful presentation of your data

## Medical Writing and Communication

Bringing expert medical writing and communication to your data throughout the product lifecycle, ensuring your communication plans are fully integrated across your business and key messages effectively communicated

## Clinical Development and Operations

Optimising the planning and execution of your clinical trials including medical monitor, research scientist/physician and DSMB participation, so you get the most out of your results

## Quality and Compliance

Ensuring your organisation's quality framework is appropriately demonstrated and documented, from writing an individual SOP to full QMS implementation and audit preparedness services

## Strategic Consultancy

Helping you make informed portfolio management decisions with competitive landscape analyses, clinical development plans and integrated expertise across functional areas

We offer all medical services to the Pharma industry. For services not listed above, please contact us.
