

CAPABILITY STATEMENT

OUR COMPANY

BioLuminux is a network of Clinical Research Sites that helps pharmaceutical Industries across the globe, to bring new scientific discoveries to the market in a timely, safe and efficient way.

Currently, our Research Sites are centrally located within the US and UK. We are a start-up company but growing at a rapid rate. Our goal is to have presence globally, providing quality and cost-effective supports and services to our clients.

DIFFERENTIATOR

- ◆ Network of experienced research sites with proven track records
- ◆ Quick enrollment target with high retention rate
- ◆ Streamlined budget and contracting processes that can run concurrently with ethics submission
- ◆ Standardized and consistent trial process with high-quality data
- ◆ Streamlined communication system - one focal point of contact for all sites for effective communication
- ◆ Experienced in the recruitment of a large volume of patients
- ◆ Access to diversified patient representation
- ◆ Wide area of therapeutic coverage and Specialists
- ◆ Vast knowledge and experience of regulatory requirements around the global

OUR SERVICES AND CAPABILITIES

We mainly cover late phases (2b and 3) of clinical studies in different therapy areas and conditions

Our Physicians hold full medical registrations with Licenses in their domiciled countries. They are very experienced and well versed in clinical research areas.

Areas of Therapy coverage include but not limited to:

- | | |
|-----------------------------|-------------------|
