FPM In-Company Learning

# Build a Stronger Pharma Team

**Expert-led learning  
tailored to your  
organisation**

FPM delivers in-company training programmes for organisations across the pharmaceutical industry. We work with a network of expert trainers to design and deliver high-quality, practical learning experiences.

Alongside two off-the-shelf programmes, our training team and expert facilitators can tailor courses to meet specific organisational needs, priorities, and audiences.

# Bespoke training designed around your needs

FPM's In-Company Learning supports organisations across the pharmaceutical industry with high-quality learning that is relevant, practical, and tailored to business needs.

We work with expert facilitators and trainers from across the sector to develop and deliver programmes that help teams build knowledge, confidence, and capability.

*“It is a comprehensive training on novel therapy development across the world from early identification of new entity to post-marketing activities.”*

**Participant**

*“I thought the content of the training was excellent...it covered all aspects of drug development at a level that was easy enough to grasp and gain a holistic understanding of the process.”*

**Participant**

Our expertise includes:

- Clinical research and discovery
- Pharmacology and drug safety
- Clinical development
- Healthcare marketplace and medical affairs
- Regulatory affairs
- Pharmaceutical medicine essentials

Our experts can work with you to design courses that are tailored to suit specific organisational priorities, audiences, and learning objectives.

Programmes can be delivered in person, online, or in a hybrid format, and may be scheduled to suit the needs of the business and availability of the experts.

# Our off-the-shelf programmes

## FPM Physician and Scientists Induction Programme

This tried and trusted five-day programme has been developed for physicians and scientists who have moved from clinical practice and research backgrounds to working in the pharmaceutical industry.

It aims to aid the transition by providing an overview of the drug development lifecycle from discovery to approval, with an international perspective. Theoretical knowledge and insights are combined with real-life examples, group work, case studies, and exercises throughout to encourage interaction.

**For:** physicians, pharmacists, and scientists who have recently joined industry.

**Participants will benefit by:** building a wide-ranging foundational knowledge of the pharmaceutical industry and identifying areas of interest for further development.

## From Molecule to Market: Drug Development Training

This two-day high-level training programme aims to equip delegates with an understanding of the basic principles of drug development and clinical studies, and of the regulatory framework for new drug approval.

Theoretical knowledge and insights are combined with real-life examples, group work, case studies, and exercises throughout to encourage interaction.

**For:** non-clinical team members such as project and programme managers, planners, and data analysts, as well as physicians and scientists who are new to industry.

**Participants will benefit by:** developing a broad understanding of drug development and identifying areas for further development.

 *The course is very well run and the workshop highly relevant. I would recommend this to all who want a solid topical introduction to clinical development.*  
**Participant**

# Expert trainers. Practical insight.

FPM works with a network of highly experienced trainers from across the pharmaceutical industry. Our faculty bring deep expertise spanning clinical development, medical affairs, clinical pharmacology, translational medicine, drug safety, and more.

## Our lead trainers

We work with a bank of expert trainers who can deliver programmes online or at your company's premises. Meet two of our lead trainers:

### Dr Jeymi Tambiah

Chief Medical Officer  
at biotechnology  
company  
Genascence  
Corporation with extensive  
experience spanning preclinical  
development to late-phase trials,  
medical affairs, and drug launches.

### Dr Jim Bush

Vice President of  
Medical Services,  
Clinical  
Pharmacology and  
Principal Investigator at  
Fortrea, with deep expertise in early  
phase development and First-in-  
Human studies.

## Further study with FPM

For participants looking to undertake further self-study, there is also the option of sitting the Certificate in Pharmaceutical Medicine (CPM). FPM qualifications are formally accredited and internationally recognised.
